

Fraction Wall Activity

I can compare fractions.	

Cut out the strips on the following page.

- 1. Colour, label and stick in your first strip without folding it on to the first line of the grid below. This is 1 whole.
- 2. Fold the second strip in half, then colour and label the pieces. Stick them under the whole. These are 2 halves.
- 3. Fold the next strip into 3 pieces. Measure it first. Each piece should measure 5cm. Colour and label the pieces, and stick them under the halves. These are 3 thirds.
- 4. Fold the next strip in half and half again. Colour and label the pieces, and stick them under the thirds. These are 4 quarters.
