

Boris, Norris and Morris Activity

I can find $\frac{1}{3}$.

Meet Boris, Norris and Morris.

They have been naughty and need to be kept apart from each other.

Tick the cages that the zookeeper can use. Remember they have to have the same amount of space each.

Can you divide these cages into $\frac{1}{3}$ s so the monkeys each have the same amount of space?

Colour this circular cage to show how many sections they can have each.

Feeding Time!

How much food can each monkey have?

Each monkey will get bananas.

Each monkey will get strawberries.

Each monkey will get oranges.

Challenge!

If each of the monkeys has 2 apples, how many apples did the zookeeper buy?

The zookeeper bought apples.
