We hope you enjoy the resource and we'll see you very soon! x

The River Thames

View of Big Ben and the Houses of Parliament from the Thames.

The River Thames is 346 km long, making it the longest river in England and the second longest in the United Kingdom.

The source of the Thames is at Thames Head in Gloucestershire, and it flows into the North Sea at the Thames Estuary.

Although the river is now mainly used for tourism, its main use was once for transporting goods in and out of the country.

Did You Know?

The river is policed by five police forces and there is also a London Fire Brigade fire boat on the river.

The Amazon

The Amazon River is the second longest river in the world and has the largest capacity.

The river is 6 miles wide at its widest point.

The river's source is formed by melting glaciers found high in the mountains of Peru. It then flows through Brazil, Ecuador, Bolivia, Colombia, Peru and Venezuela before flowing into the Atlantic Ocean.

The Amazon is one of the main habitats of the river dolphin.

The Amazon flows through the largest Rainforest in the world.

Did You Know?

The Amazon was named by a Spanish explorer who told stories of a tribe of female warriors who lived by the river.

The River Nile

Did You Know?

Nearly all the cultural and historical sites of Ancient Egypt are found along the riverbanks of the Nile.

The Nile is 6,650 km long, making it the longest river in the world.

The Nile is in north-eastern Africa and runs through Sudan, Burundi, Rwanda, DR Congo, Tanzania, Kenya, Ethiopia, Uganda and Egypt.

The river's source is in the rainforests of Rwanda and its mouth is in the Mediterranean Sea.

The Egyptians have depended on the river since ancient times. The banks of the Nile are full of valuable minerals enabling farmers to grow crops in the fertile soil.

The Ganges

The Ganges is 2,525 km long and starts its journey in the Himalayas.

The river flows through Nepal, India and Bangladesh, where it empties into the Bay of Bengal.

The Ganges deposits minerals and nutrients into the surrounding land making it ideal for farming.

The Ganges is heavily polluted due to the many cities that deposit waste products into it. Pollution threatens both humans and more than 140 fish species.

Did You Know?

Hindus believe the waters of the Ganges are purifying and if they bathe in the river their sins will be forgiven and they will be cured of illness.

'Wishing candles' are placed in the river to represent a wish for a friend or family member.

The Mississippi

Minneapolis on the banks of the Mississippi.

Did You Know?

The name Mississippi comes from the Anishinabe people who called the river 'Messipi' which means Big River or Father of the Waters.

The Mississippi is 3779 km long making it the longest river in America.

In 1922 water skiing was invented on the Mississippi river.

The river source is at Lake Itasca in Northern Minnesota in the USA and it flows through 10 states before emptying into the Gulf of Mexico .

The Lake Pontchartrain Causeway is the second longest road bridge in the world and crosses the river in New Orleans. It is 24 miles long!

The Yangtze

(Cháng Jiāng)

The Yangtze is the longest river in Asia and the third longest in the world.

It flows for 6,418 km from glaciers on the Tibetan Plateau to the East China Sea at Shanghai.

The Yangtze is heavily polluted by local industry.

The River Dolphin that used to live in the river is now extinct and the river is home to three endangered species: the Chinese Alligator, Chinese Paddlefish and the River Pig (porpoise).

Did You Know?

The river is home to the Three Gorges Dam, the world's largest power station.

The Murray River

The Murray is
2,575 km long.

Dams were built to assist with irrigating the land to help crops grow but this has drawn water away from ecosystems that need it.

The source of the river is high in the Australian Alps.
The river flows into the Indian Ocean.

There are many animals in the Murray River that can only be found in Australian waters including Golden Perch, Murray Cod and the Platypus.

Did You Know?

The Aborigines believed the river was created by the great ancestor Ngurunderi as he chased Pondi (The Murray Cod) through the landscape.

The Volga

The Volgar is the longest river in Europe, measuring 3,692 km.

The source of the river is in the Valdai Hills in Russia and it's mouth is at the Caspian Sea.

The river valley is very fertile and rich in minerals, making it an ideal environment for growing wheat.

The pollution caused by the many industrial areas the river runs through is of great environmental concern.

The river is mostly used for transport and shipping goods. It is also used for supplying electricity to the surrounding towns and cities.

The Volga is a source of Caviar, a delicacy made from the eggs of the Sturgeon fish.

Did You Know?

The Volga was widened in places for navigation purposes.
